

FTP DETAILS

FTP DETAILS

Details for uploading your 'press ready' files to our ftp site are as follows:

You will need an FTP uploading program (eg. cyberduck), as you can't use this through the internet.

server: [gimix.patto.net](ftp://gimix.patto.net)

username: gimixguest

password: none

(No password is needed. If your program needs a password to work, you can enter any letter and it should work).

This will put you into the 'upload' directory in the gimix account. From here you can upload files.

Please email us when you have finished uploading your files with the file names.
